Civil Engineering NEWS Letter Aug-Sep

*If you can picture  
it you can achieve  
it*

*If God didn't  
build it A Civil  
engineer did it.*

A top engineer from the city of Los Angeles visited Cornell University this month as researchers tested a new earthquake-resilient pipeline has been designed to better protect Southern California's water utility network from natural disasters. They ran multiple tests, including an earthquake simulation in which a 28-foot-long section of the pipe was outfitted with more than 120 monitoring instruments and buried within 80 tons of soil—an experiment that took over a month for the research team to prepare.
